

## Fourmore

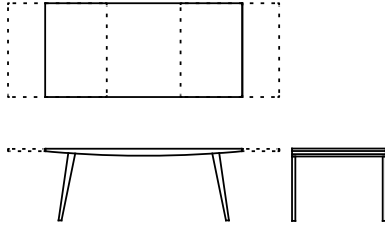

Gordon Guillaumier

The extendible dining table is always a design challenge in combining the balance of technical and formal functioning. Fourmore makes a synthesis of this balance with a simple gesture of the mechanism, together with aesthetic and linear rigour, where the table maintains its proportion, both in the closed and extended versions.

## Available models

Table with frame structure made of 10 mm laser-cut steel sheet, CNC-milled top and extension. Mechanical details in moulded plastic on specific design. Sliding systems on aluminium tracks with self-lubricating runners.
