Helsinki Bookcase

Caronni + Bonanomi, 2009

The Helsinki Bookcase project is a true all-rounder designed to define the living space. Each element becomes a design detail that interacts with the environment, capable of meeting multiple needs without unnecessary embellishments. The steel tube structure, aluminum die-cast joints, and box-section shelves provide solidity and lightness to the system, while adjustable feet and drop-down compartments or doors in wood veneer complete the modularity and functionality of the project.
