## Pocci + Dondoli, 2023

## Koki Wire - Corda

An unprecedented version of Koki Wire whose character is accentuated by the contrast between the woven rope finish - the protagonist of the seat - and the metal structure. Light, essential and versatile, it fits harmoniously into indoor and outdoor, private and public spaces.

Supporting structure with sled base and back in steel rod, woven with high tenacity polyester rope, 100% recyclable, capable of guaranteeing high resistance to atmospheric agents, light fastness, abrasions with low elongation. Powder coated frame, suitable for outdoor use.
